

when we(the consumers) signed the no call list. We KNEW what we were signing it for... not to be called at home. We were thankful that someone in our state legislation was bright enough to realize that we want our privacy respected. Now we have it active and someone wants to change it? I don't think so! That is absurd! We are adults when we signed up for the no call list and we knew what we wanted. Our state was strong enough to recognize that WI residents needed a No Call list and they developed this program. with 80% of the state residents signed up for the No Call list it's pretty evident that we are not interested in it getting changed. We still don't want telemarketing calls at home or on our cell phones that's the bottom line. Leave the No Call list As is.
